

Hydenmet Solutions

EARTH NETWORKS

In partnership with Earth Networks (EN)

Presents **STAGE**  
Your Agriculture Advisor

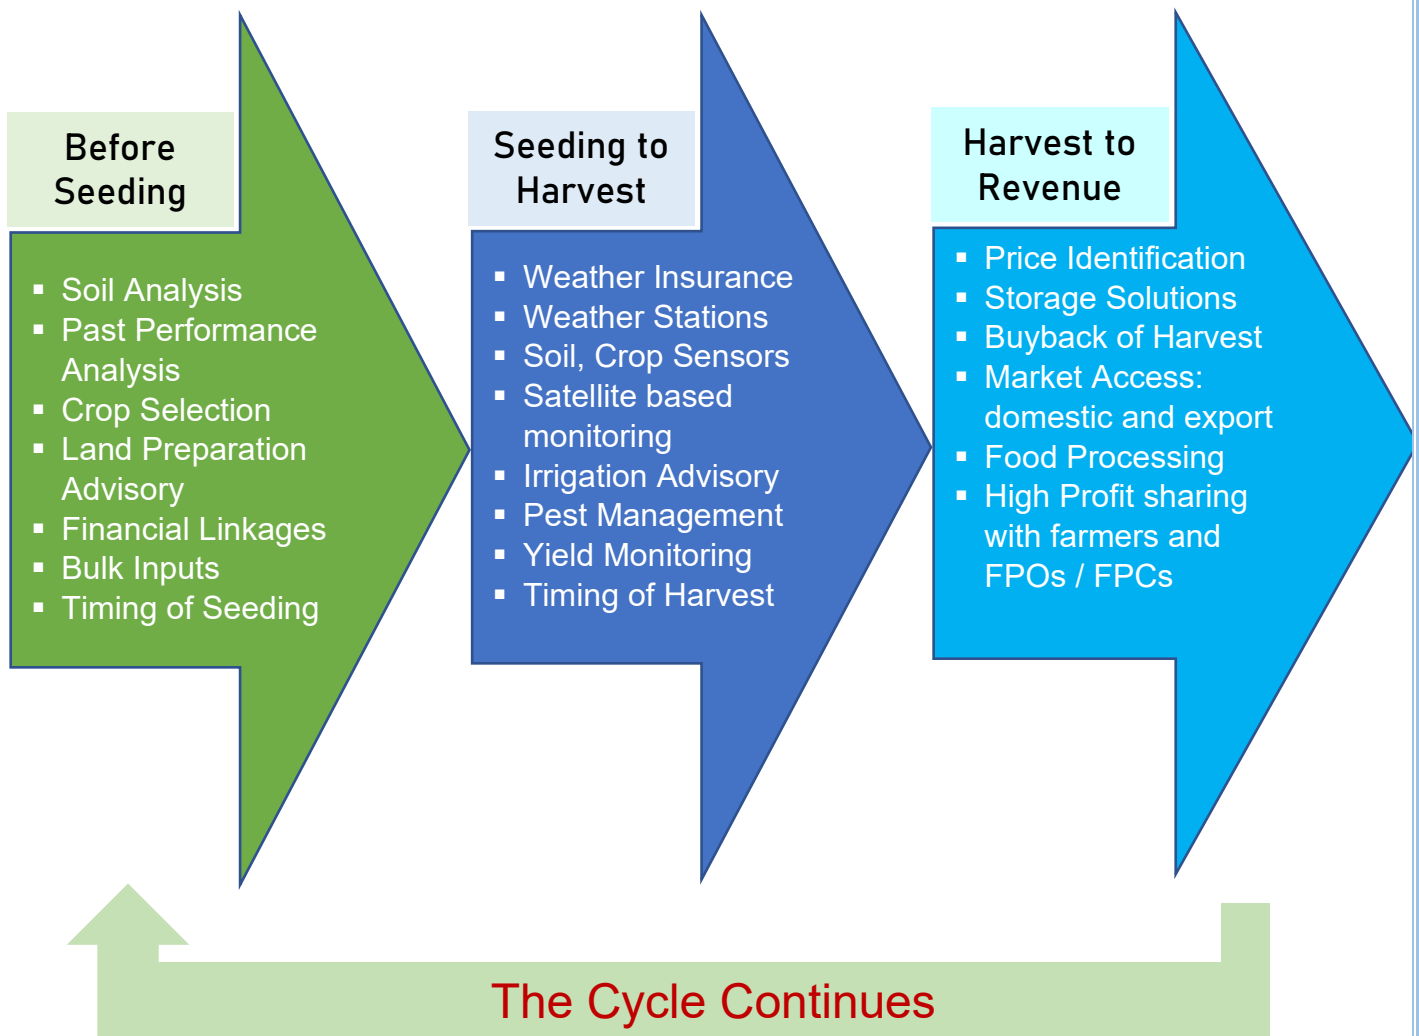

**STAGE** expanding to Smart Technology-Based Agriculture Enabler is a technology based advisory platform that hand-holds farmers and Farmer Producer Companies / Organizations (FPOs/FPCs) through all three phases of the agriculture lifecycle:

- Pre-Seeding
- Seeding to Harvest
- Harvest to Revenue

STAGE addresses all concerns of farmers while working towards making FPOs/FPCs profitable and puts them on the growth path.

The **STAGE** program deploys educated trained Agriculture Managers to work closely with farmers and FPOs / FPCs to deliver daily advisory at various stages

## HYDENMET brings technology from its partners across the world

Earth Networks is a world-leader in weather solutions. They run the largest weather network in the world with over 1800 lightning sensors and over 12,000 automatic weather stations, serving over 104 countries.

Davis Instruments is a world leader in Agri-tech. Their Enviro Monitors and sensors are widely used in advanced countries for providing effective weather and crop advisory.

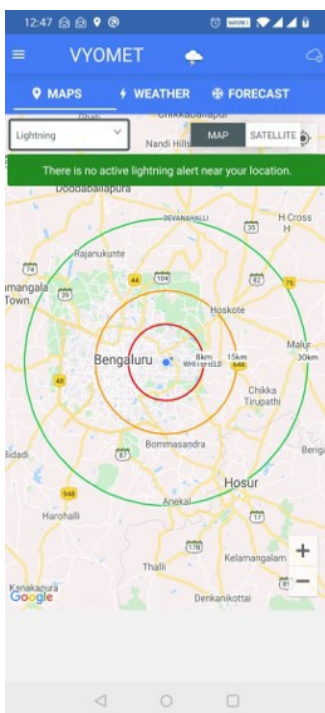

Boomitra is an emerging leader in providing effective monitoring of farms using satellites. Their Artificial Intelligence Platform provides API's to Hydenmet to access a variety of location-specific soil and plant data.

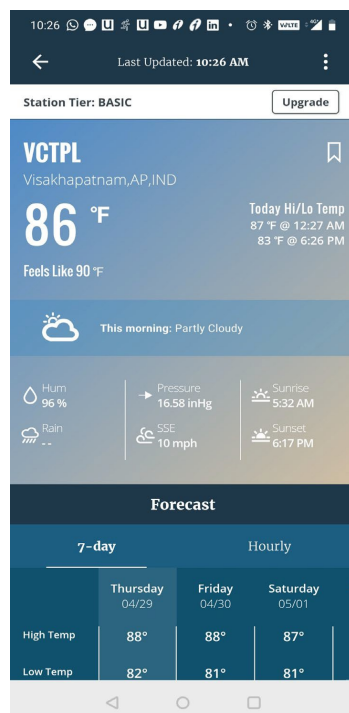

AGRIIPRINCE mobile app consumes market and mandi data from across India and uses an Artificial Intelligence Platform to provide best price identification to farmers based on their location, crop and variety.

## Weather & Crop Advisory through Mobile Apps and E-Mails
